

Full, expanded example of the weekly executive report that the Python script would generate and distribute to the cross-departmental leadership team via Slack.

This report is designed for VPs and Department Heads to assess organizational growth, identify systemic bottlenecks, and hold hiring managers accountable.

Weekly Cross-Departmental Hiring Report

Week Ending: Friday, June 12, 2026

Distribution: [#leadership-updates](#)

1. Executive Summary

The recruiting pipeline remains strong with steady growth in the engineering and sales departments. This week, we extended 5 new offers and successfully closed 3 high-priority roles. However, we are seeing a bottleneck at the "Technical Assessment" grading stage, which is elongating our time-to-hire metrics for mid-level engineering roles.

- **Total Active Candidates in Pipeline:** 152
- **Total Offers Currently Pending:** 12
- **High Priority / Critical Fills Active:** 68
- **Offers Accepted This Week:** 3

2. Cross-Functional Bottlenecks (Action Required)

The following hiring managers currently have candidates flagged as "Stuck" in the pipeline for more than 48 hours. Department heads, please work with your managers to unblock these candidates before the weekend.

- **Bob Jones's Team (Engineering):** 4 candidates stuck awaiting action/feedback.
 - *Primary Issue:* Delays in grading take-home technical assessments.
- **Nick Fury's Team (Data / Intelligence):** 3 candidates stuck awaiting action/feedback.
 - *Primary Issue:* Counter-offers pending VP approval; one candidate pending interview panel assignment.
- **Hector Barbossa's Team (Sales):** 2 candidates stuck awaiting action/feedback.
 - *Primary Issue:* Offer compensation packages pending Finance approval.
- **Lucy Van Pelt's Team (Product):** 1 candidate stuck awaiting action/feedback.
 - *Primary Issue:* Need to reschedule final onsite interview due to manager PTO.

3. Departmental Pipeline Volume (Top Active Hiring Managers)

(In the actual PDF, this section is accompanied by a horizontal bar chart:

[manager_volume_chart.png](#))

Currently tracking which department leaders are managing the highest volume of active interviews.

1. **Bob Jones (Engineering):** 28 Active Candidates

2. **Carter Burke (Operations):** 22 Active Candidates
3. **Nick Fury (Data):** 19 Active Candidates
4. **Lucy Van Pelt (Product):** 15 Active Candidates
5. **Norman Osborn (R&D):** 14 Active Candidates
6. **Hector Barbossa (Sales):** 12 Active Candidates
7. **John Hammond (Executive):** 9 Active Candidates

4. Macro Pipeline Health & Funnel Conversion

(In the actual PDF, this section is accompanied by an area drop-off chart:

[macro_funnel_chart.png](#))

Company-wide aggregate of candidate distribution. We are currently seeing a steep 45% drop-off between the Phone Screen and Technical Assessment stages.

- **Sourcing / Outreach:** 45 Candidates (29.6%)
- **Phone Screen:** 38 Candidates (25.0%)
- **Technical / Take-Home Assessment:** 21 Candidates (13.8%)
- **Onsite / Panel Interview:** 24 Candidates (15.7%)
- **Executive Interview:** 12 Candidates (7.8%)
- **Offer Stage:** 12 Candidates (7.8%)

5. Critical Roles Unfilled (>45 Days on Market)

The following high-priority positions have been open for over 45 days and may require a change in sourcing strategy, compensation banding, or title leveling.

- **Lead Machine Learning Engineer** (Req #402) - Open 62 Days
- **VP of Corporate Sales** (Req #311) - Open 54 Days
- **Senior DevOps Reliability Engineer** (Req #415) - Open 48 Days
